Java Programming for Beginners

Lab Exercise 1

1) Set up a Java development environment. In the *main()* method of your program try to compile the following invalid Java code snippets. Record the error messages you receive. What do you think each error message indicates?

System.out.printn("Hello World")

_____

System.out.printn(Hello World)

_____

System.out.println"Hello World";

_____

println("Hello World);

_____

2) To generate one final error message, remove one of the brackets from the end of your program. Now what message do you receive?

_____

_____

_____
